

Amalia Mangundu Contribution Report

Amalia Mangundu Contribution Report

Student Details

- GitHub username: amaliamangundu-tech - Repository: AmaliaMangunduPortfolio - Live portfolio: <https://amaliamangundu-tech.github.io/AmaliaMangunduPortfolio/> - Project: SiteSpy

Contribution Area

Profile, settings, and reusable buttons

SiteSpy Project Context

SiteSpy is a construction support app that keeps project records, helps with wall measurements and material estimation, and prepares information for later review.

Work I Should Be Able To Explain

- The purpose of my assigned area. - The files, screens, or documentation connected to my area. - How the portfolio was deployed. - How evidence screenshots prove the work. - How GitHub supports a team workflow.

Current Evidence Status

Evidence screenshots must be captured manually and added only when they are real and student-specific. Missing evidence is not displayed as a public card.

Next Steps

- Capture the screenshots listed in the central checklist. - Add them to the local portfolio folder. - Create an evidence branch. - Commit the evidence files. - Open a pull request if required. - Confirm the GitHub Pages deployment succeeds.
