

Amalia Mangundu Presentation Guide

Amalia Mangundu Presentation Guide

Portfolio Details

- GitHub username: amaliamangundu-tech - Repository: AmaliaMangunduPortfolio - Live portfolio: <https://amaliamangundu-tech.github.io/AmaliaMangunduPortfolio/> - Project: SiteSpy

Project Summary

SiteSpy is a mobile-focused project tool built with Expo React Native and Firebase. It helps users keep project records, review measurements, estimate materials, and prepare clear summaries.

My Contribution Summary

My assigned preparation area is: Profile, settings, and reusable buttons.

What I Should Explain

- What SiteSpy does for a user. - Which part of the project I reviewed or prepared. - How my portfolio is deployed with GitHub Pages. - How my evidence screenshots connect to my contribution area. - What I learned about Git, GitHub, and team collaboration.

Programming Concepts To Understand

- HTML, CSS, and JavaScript static site structure. - Git commits and commit messages. - Branches and pull requests. - GitHub Actions and GitHub Pages deployment. - Evidence screenshots and teamwork.

Q&A Preparation

What did I contribute?

I prepared and reviewed work around Profile, settings, and reusable buttons.

What did I learn?

I learned how project work is organised with GitHub, how static portfolios are deployed, and how evidence should be connected to real tasks.

What challenge did I face?

A key challenge is making sure the portfolio shows only real evidence and explains the contribution clearly.

What would I improve next?

I would add stronger real evidence screenshots and keep improving the explanation of my assigned project area.
