

Haipumbu Beatha NP Contribution Report

Haipumbu Beatha NP Contribution Report

Student Details

- GitHub username: beathapawana-dot - Repository: HaipumbuBeathaNPPortfolio - Live portfolio: <https://beathapawana-dot.github.io/HaipumbuBeathaNPPortfolio/> - Project: SiteSpy

Contribution Area

My contribution focused on the calculation workflow that connects measurements, saved estimates, and clear construction project outputs.

Project Context

SiteSpy is a construction support app that keeps project records, helps with wall measurements and material estimation, and prepares information for later review.

Challenge and Solution

The main challenge was explaining calculations without making the page feel overloaded. The solution was a direct technical layout with concise result blocks.

Learning Reflection

I improved my confidence with measurement logic, project documentation, and disciplined Git commits.
