Haipumbu Beatha NP Presentation Report

Portfolio Details

- GitHub username: beathapawana-dot - Repository: HaipumbuBeathaNPPortfolio - Live portfolio: <https://beathapawana-dot.github.io/HaipumbuBeathaNPPortfolio/> - Project: SiteSpy

Project Summary

SiteSpy is a mobile-focused project tool built with Expo React Native and Firebase. It supports construction project records, measurement review, estimate summaries, and clear project reporting.

Contribution Summary

My contribution focused on the calculation workflow that connects measurements, saved estimates, and clear construction project outputs.

Challenge and Solution

The main challenge was explaining calculations without making the page feel overloaded. The solution was a direct technical layout with concise result blocks.

Learning Reflection

I improved my confidence with measurement logic, project documentation, and disciplined Git commits.

Presentation Notes

- Explain what SiteSpy does for a user. - Describe the assigned project area. - Connect the public portfolio to the GitHub repository. - Discuss GitHub Pages deployment and team collaboration. - Refer to real screenshots only after they have been captured from the student's own repository or project work.
