

Hamberera Karl PM Presentation Report

Hamberera Karl PM Presentation Report

Portfolio Details

- GitHub username: karlhamberera - Repository: HambereraKarlPMPortfolio - Live portfolio: <https://karlhamberera.github.io/HambereraKarlPMPortfolio/> - Project: SiteSpy

Project Summary

SiteSpy is a mobile-focused project tool built with Expo React Native and Firebase. It supports construction project records, measurement review, estimate summaries, and clear project reporting.

Contribution Summary

My contribution focused on documenting how project records are organised and how reliable data structure supports the SiteSpy workflow.

Challenge and Solution

The main challenge was turning data structure notes into a readable showcase. The solution was a documentation-first layout with clear sections.

Learning Reflection

I learned how data decisions affect user experience, collaboration, and long-term project maintainability.

Presentation Notes

- Explain what SiteSpy does for a user. - Describe the assigned project area. - Connect the public portfolio to the GitHub repository. - Discuss GitHub Pages deployment and team collaboration. - Refer to real screenshots only after they have been captured from the student's own repository or project work.
