Martha Heita Presentation Report

Portfolio Details

- GitHub username: marthandilimengungo-dotcom - Repository: MarthaHeitaPortfolio - Live portfolio: <https://marthandilimengungo-dotcom.github.io/MarthaHeitaPortfolio/> - Project: SiteSpy

Project Summary

SiteSpy is a mobile-focused project tool built with Expo React Native and Firebase. It supports construction project records, measurement review, estimate summaries, and clear project reporting.

Contribution Summary

My contribution focused on form feedback, validation states, loading states, and the quality of the app experience during everyday use.

Challenge and Solution

The main challenge was describing interface quality as practical project work. The solution was a polished product-quality layout with concise examples.

Learning Reflection

I learned how small interface details can make a technical app feel clearer, more reliable, and easier to trust.

Presentation Notes

- Explain what SiteSpy does for a user. - Describe the assigned project area. - Connect the public portfolio to the GitHub repository. - Discuss GitHub Pages deployment and team collaboration. - Refer to real screenshots only after they have been captured from the student's own repository or project work.
