

Mathias Jonas Contribution Report

Mathias Jonas Contribution Report

Student Details

- GitHub username: Mathias4040 - Repository: MathiasJonasPortfolio - Live portfolio: <https://Mathias4040.github.io/MathiasJonasPortfolio/> - Project: SiteSpy

Contribution Area

My contribution focused on how project history and detail views help users return to earlier work and understand saved records.

Project Context

SiteSpy is a construction support app that keeps project records, helps with wall measurements and material estimation, and prepares information for later review.

Challenge and Solution

The main challenge was making workflow history feel concrete. The solution was a dashboard-style page with focused process cards.

Learning Reflection

I learned how navigation, saved records, and readable detail views support a practical project app.
