

Mathias Jonas Presentation Report

Mathias Jonas Presentation Report

Portfolio Details

- GitHub username: Mathias4040 - Repository: MathiasJonasPortfolio - Live portfolio: <https://Mathias4040.github.io/MathiasJonasPortfolio/> - Project: SiteSpy

Project Summary

SiteSpy is a mobile-focused project tool built with Expo React Native and Firebase. It supports construction project records, measurement review, estimate summaries, and clear project reporting.

Contribution Summary

My contribution focused on how project history and detail views help users return to earlier work and understand saved records.

Challenge and Solution

The main challenge was making workflow history feel concrete. The solution was a dashboard-style page with focused process cards.

Learning Reflection

I learned how navigation, saved records, and readable detail views support a practical project app.

Presentation Notes

- Explain what SiteSpy does for a user. - Describe the assigned project area. - Connect the public portfolio to the GitHub repository. - Discuss GitHub Pages deployment and team collaboration. - Refer to real screenshots only after they have been captured from the student's own repository or project work.
