Amalia Mangundu Presentation Report

Portfolio Details

- GitHub username: amaliamangundu-tech - Repository: AmaliaMangunduPortfolio - Live portfolio: <https://amaliamangundu-tech.github.io/AmaliaMangunduPortfolio/> - Project: SiteSpy

Project Summary

SiteSpy is a mobile-focused project tool built with Expo React Native and Firebase. It supports construction project records, measurement review, estimate summaries, and clear project reporting.

Contribution Summary

My contribution focused on profile, settings, and reusable controls that help the app feel consistent across screens.

Challenge and Solution

The main challenge was connecting reusable UI work to visible project value. The solution was a product-focused showcase.

Learning Reflection

I learned how consistency, settings, and reusable elements improve a user's confidence in an app.

Presentation Notes

- Explain what SiteSpy does for a user. - Describe the assigned project area. - Connect the public portfolio to the GitHub repository. - Discuss GitHub Pages deployment and team collaboration. - Refer to real screenshots only after they have been captured from the student's own repository or project work.
