

Kavakuru Metarere Presentation Report

Kavakuru Metarere Presentation Report

Portfolio Details

- GitHub username: Kavakuru-Metarere7 - Repository: KavakuruMetarerePortfolio - Live portfolio: <https://Kavakuru-Metarere7.github.io/KavakuruMetarerePortfolio/> - Project: SiteSpy

Project Summary

SiteSpy is a mobile-focused project tool built with Expo React Native and Firebase. It supports construction project records, measurement review, estimate summaries, and clear project reporting.

Contribution Summary

My contribution focused on the authentication screens and the flow between login, registration, and password recovery.

Challenge and Solution

The main challenge was presenting authentication flow without implementation clutter. The solution was a clear split-layout case study.

Learning Reflection

I learned how entry screens shape trust and how clear account flows support a practical mobile app.

Presentation Notes

- Explain what SiteSpy does for a user. - Describe the assigned project area. - Connect the public portfolio to the GitHub repository. - Discuss GitHub Pages deployment and team collaboration. - Refer to real screenshots only after they have been captured from the student's own repository or project work.
