

Emily Ndapuka Presentation Report

Emily Ndapuka Presentation Report

Portfolio Details

- GitHub username: emilly20-06 - Repository: EmilyNdapukaPortfolio - Live portfolio: <https://emilly20-06.github.io/EmilyNdapukaPortfolio/> - Project: SiteSpy

Project Summary

SiteSpy is a mobile-focused project tool built with Expo React Native and Firebase. It supports construction project records, measurement review, estimate summaries, and clear project reporting.

Contribution Summary

My contribution focused on project creation, field input structure, and manual estimate forms for construction project records.

Challenge and Solution

The main challenge was making forms feel like field work instead of abstract data entry. The solution was a profile-and-process layout.

Learning Reflection

I learned how form structure, validation, and concise labels support efficient project recording.

Presentation Notes

- Explain what SiteSpy does for a user. - Describe the assigned project area. - Connect the public portfolio to the GitHub repository. - Discuss GitHub Pages deployment and team collaboration. - Refer to real screenshots only after they have been captured from the student's own repository or project work.
