

Shikongo Linus TK Presentation Report

Shikongo Linus TK Presentation Report

Portfolio Details

- GitHub username: Linus45-blid - Repository: ShikongoLinusTKPortfolio - Live portfolio: <https://Linus45-blid.github.io/ShikongoLinusTKPortfolio/> - Project: SiteSpy

Project Summary

SiteSpy is a mobile-focused project tool built with Expo React Native and Firebase. It supports construction project records, measurement review, estimate summaries, and clear project reporting.

Contribution Summary

My contribution focused on deployment notes, release readiness, and the steps that help a project become presentable online.

Challenge and Solution

The main challenge was making deployment work visible without turning the page into a command list. The solution was a compact code-themed report.

Learning Reflection

I learned how deployment settings, clear scripts, and GitHub workflows support project delivery.

Presentation Notes

- Explain what SiteSpy does for a user. - Describe the assigned project area. - Connect the public portfolio to the GitHub repository. - Discuss GitHub Pages deployment and team collaboration. - Refer to real screenshots only after they have been captured from the student's own repository or project work.
