Hilma Shuumbwa Presentation Report

Portfolio Details

- GitHub username: hilma-shuumbwa - Repository: HilmaShuumbwaPortfolio - Live portfolio: <https://hilma-shuumbwa.github.io/HilmaShuumbwaPortfolio/> - Project: SiteSpy

Project Summary

SiteSpy is a mobile-focused project tool built with Expo React Native and Firebase. It supports construction project records, measurement review, estimate summaries, and clear project reporting.

Contribution Summary

My contribution focused on configuration loading, environment awareness, and the checks that help the app start reliably.

Challenge and Solution

The main challenge was explaining runtime configuration without exposing private values. The solution was a minimal technical report layout.

Learning Reflection

I learned how configuration choices affect reliability across development, preview, and release builds.

Presentation Notes

- Explain what SiteSpy does for a user. - Describe the assigned project area. - Connect the public portfolio to the GitHub repository. - Discuss GitHub Pages deployment and team collaboration. - Refer to real screenshots only after they have been captured from the student's own repository or project work.
