

Tjatindi Michael Kazundire Presentation Report

Portfolio Details

- GitHub username: IcyBeibi68023 - Repository: TjatindiMichaelKazundirePortfolio - Live portfolio: <https://IcyBeibi68023.github.io/TjatindiMichaelKazundirePortfolio/> - Project: SiteSpy

Project Summary

SiteSpy is a mobile-focused project tool built with Expo React Native and Firebase. It supports construction project records, measurement review, estimate summaries, and clear project reporting.

Contribution Summary

My contribution focused on security rules, access notes, and how project records can be protected in a Firebase-backed app.

Challenge and Solution

The main challenge was communicating security work clearly. The solution was an editorial portfolio layout with concise report sections.

Learning Reflection

I learned how access rules and documentation help protect project information while supporting teamwork.

Presentation Notes

- Explain what SiteSpy does for a user. - Describe the assigned project area. - Connect the public portfolio to the GitHub repository. - Discuss GitHub Pages deployment and team collaboration. - Refer to real screenshots only after they have been captured from the student's own repository or project work.
